

神 Godo Town

Flood Hazard Map

This "Godo Town Flood Hazard Map" is based on the "Flood Inundation Risk Area Map (Assumed Largest Scale)" for Ibi River and Neo River created by the Kisogawa-Joryu River Office, Chubu Regional Development Bureau, Ministry of Land, Infrastructure, Transport and Tourism (MLIT) in 2020. This map shows areas possibly subject to inundation in our town, and their flood depths, areas where houses may be washed away or collapse (Flooding assumption area with house collapse risk, etc.), and the duration of inundation when heavy rain falls in the Ibi River and Neo River basins.

Please discuss the route from your house to evacuation shelters and how to communicate in case of emergency. Also, in case of heavy rain, be careful about how it rains and how water floods around your house. If you feel in danger, evacuate early and do your best to take safe evacuation actions. We hope you will use this hazard map as an aid.

2020

Contact Information General Affairs Division, General Affairs Department, Godo Town Hall

1111 Godo, Oaza Godo-cho, Anpachi-gun, Gifu Prefecture 503-2392 Phone: 0584-27-0171 FAX: 0584-27-8224

In addition to the "Flood Hazard Map", a "Seismic Hazard Map" is also posted on our town's website.

Disaster Prevention Knowledge

Evacuations are actions to protect your lives

Move to a sturdy building near you, or the upper floors of your house, and act in the best way you can at that time.

Evacuation support for vulnerable people

We need the cooperation of everyone in the area so that vulnerable people can safely evacuate!

Check dangerous places etc. in advance!

- Dangerous places around your house
- Evacuation destination and routes

Check this Flood Hazard Map and the hazard maps that have already been distributed, and discuss multiple evacuation routes with your family.

Consider your clothes when you evacuate!

- Safe and comfortable clothes

- Helmet (disaster prevention hood)
- Work gloves or leather gloves
- Backpack
- Long sleeves and pants
- Comfortable shoes

• Raincoat / cold protection for rain and wind

• Attach a name tag to small children

Check before leaving your house!

- Did you close doors and gas stopcock?
- Did you turn off electric breakers?

If you forget to turn it off there is a great danger of electrical fire.

Stockpile food and drinking water!

- Stocks for three days or more for the number of household members
- Check the Inundation Duration Time of your house on the map and store the necessary amount

Prepare the necessary items listed on the "Disaster Evacuation Card", put them in your backpacks, and store them in places where you can easily get to them.

- Let's make running stock (stockpiling for domestic distribution)

Store long-lived foods such as cup noodles and ready-to-eat instant meals in a slightly larger amount than your usual consumption. Then, while replenishing the consumed amount, strive for efficient stockpiling.

How to use NTT Disaster Emergency Message Dial

Registration/confirmation by phone

How to use NTT Disaster Emergency Message Dial (171)

What to record • Name • Health status • Safety of family • Evacuation site

Dial
1 7 1

Dial 171 to hear voice usage guidance.

Dial 1
to record

Dial 2
to play back

(0584)-00-XXXX
(For a fixed-line phone, dial starting with the area code)

Those inside disaster-stricken areas The telephone number of your house or the telephone number of a person inside the disaster-stricken area that you want to contact.
Those outside the disaster-stricken area The telephone number of a person inside the disaster-stricken area that you want to contact.

You can record your message.

You can play back messages.

Registration/confirmation on the Internet

Ibi River / Neo River Inundation Duration Time Map

This Inundation Duration Time Map shows how long it will take for the inundated water to drain when the Ibi and Neo Rivers are flooded due to the largest possible rainfall (rainfall with a probability of occurring once every 1,000 years: total rainfall of 667 mm for 2 days) and inundated due to an embankment breakage.

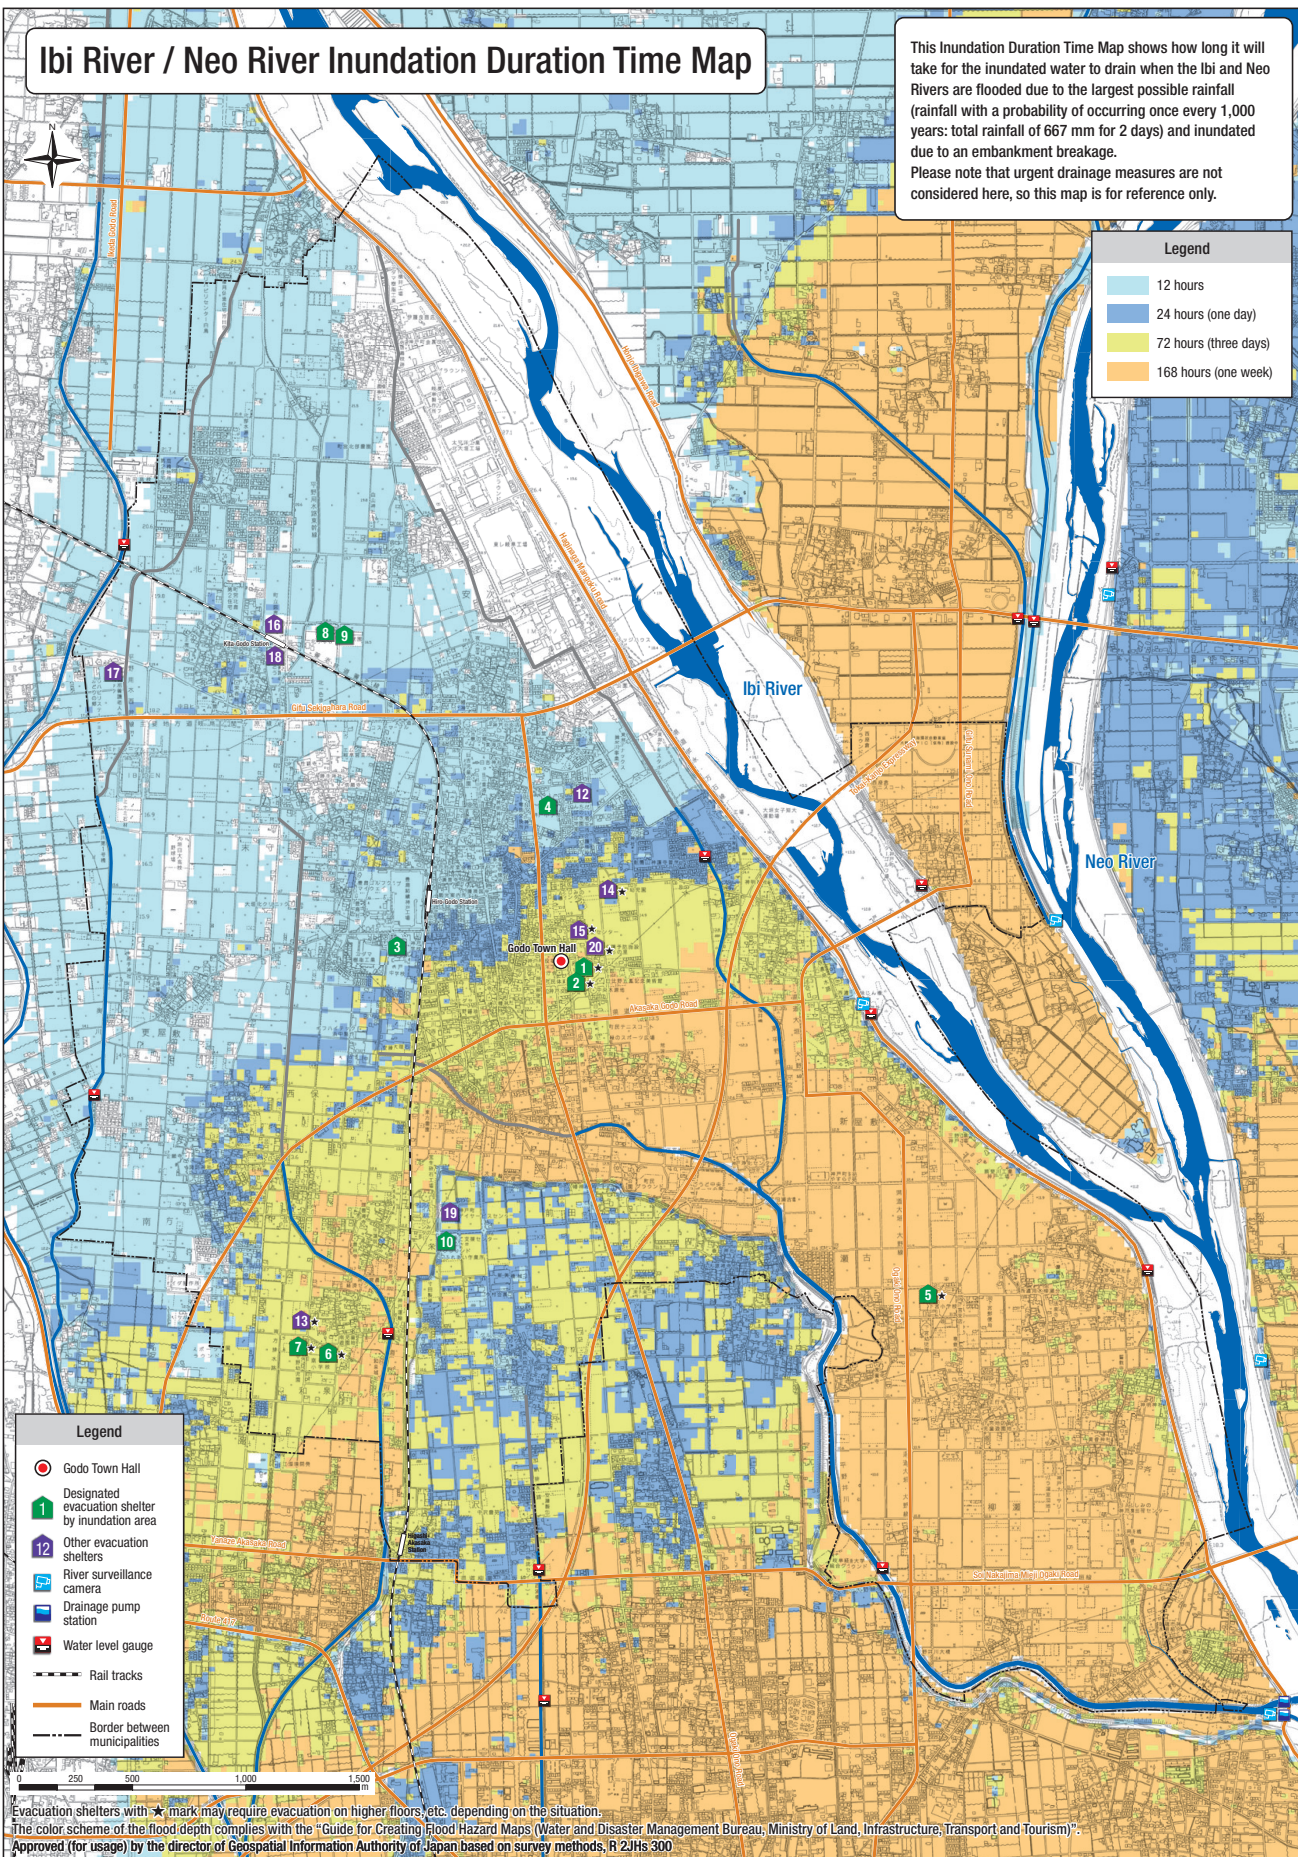

Please note that urgent drainage measures are not considered here, so this map is for reference only.

Legend

- 12 hours
- 24 hours (one day)
- 72 hours (three days)
- 168 hours (one week)

Legend

- Godo Town Hall
- Designated evacuation shelter by inundation area
- Other evacuation shelters
- River surveillance camera
- Drainage pump station
- Water level gauge
- Rail tracks
- Main roads
- Border between municipalities

Evacuation shelters with ★ mark may require evacuation on higher floors etc. depending on the situation.

The color scheme of the flood depth complies with the "Guide for Creating Flood Hazard Maps (Water and Disaster Management Bureau, Ministry of Land, Infrastructure, Transport and Tourism)".

Approved (for usage) by the director of Geospatial Information Authority of Japan based on survey methods, R 2JHs 300
